ENTOMOLOGICAL NEWS.

157

- 116, 7846 *Mordellistena unicolor* Lec. A few specimens at Cloudcroft and Wootens.
- 117, *Nolosus montanus* Casey. One specimen, Wootens. N.
- 118, *Anthicus* sp. One specimen at Wootens.
- 119, 7939 " *cervinus* Laf. Several specimens at Wootens.
- 120, 8056 *Macrobasis lauta* Horn. One specimen at light, Alamogordo. N.
- 121, 8138 *Cantharis puberula* Lec. One specimen, Wootens. N.
- 122, *Oliorhynchidae* sp. One specimen, Cloudcroft.
- 123, 8546 *Desmoris constrictus* Say. Several specimens, Wootens.
- 124, *Smicronyx* sp. One specimen, Cloudcroft.
- 125, *Epimechus* n. sp. One specimen, Wootens.
- 126, 9928? *Cossus crenatus* Horn. Two specimens under bark, Cloudcroft. N.
- 127, 9074 *Pityophorus nitidulus* Mann. Several specimens, Cloudcroft. New to southern New Mexico.
- 128, 9200 *Hylurgops rugipennis* Mann. Common at Cloudcroft.
Five or six other undetermined species of Scolytids

A Supplementary List of the Diptera of New Jersey.

BY CHARLES W. JOHNSON, Boston, Mass. (1904)

Since the publication of Prof. J. B. Smith's list of the insects of New Jersey, in 1900, I have been able to add 166 species, making the total number of Diptera recorded from the State 1359. Prof. Smith, in his investigations of the Culicidæ, has added 23 to the list, and worked out the early stages of 31 of the species. The dates of capture are recorded the same as in the main list, viz.,—the month in roman and the day in arabic numerals. In preparing this list, I am indebted to Prof. Smith for the list of Culicidæ, and to Messrs. E. Daecke, H. L. Viereck, Charles T. Greene and George M. Greene, for important data.

MYCETOPHILIDÆ.

- Platyura subterminalis* Say. Lucaston, ix, 2 (Daecke); Riverton, viii, 11.
fasciata Latr.? Lucaston, ix, 2 (Daecke).
- clausa* Coq., page 263, should read *Ceroplatys clausus* Coq.
- Mycetophilus vitrea* Coq. Dunnfield, Delaware Water Gap, viii, 12.

CULICIDÆ.

- Culex sollicitans* Walk. The common mosquito of the coast.
tenuirostris Wied. Anglesea, vi, 21; ix, 6 (Smith).

EPHYDRIDÆ.

- Notiphila bella* Loew. Westville, vi, 15.
Psilopa fulvipennis Hine. Cape May, vii, 1 (Viereck).
Discoceerina magna Coq. Riverton, viii, 17.
Brachydeutera argentata Walk. Riverton, viii, 3; Cape May, viii, 20 (Viereck).
Ephydria subopaca Loew. Arlantic City, v, 6; Seaside Park, v, 16 (Viereck).
Canace snodgrassii Coq. Atlantic City, v, 6.
Hydrellia valida Loew. Cape May, vi, 4 (Viereck).
Parydra quadrifluberculata Loew. Cape May, vi, 4 (Viereck).
imitans Loew. Near Anglesea Junction, vi, 25 (Viereck).
Cænia fumosa Sten. Cape May, ix, 17, at light (Viereck).

DIOPSIDÆ.

- Sphyracephala brevicornis* Say. Riverton, iv, 14-20.

DROSOPHILIDÆ.

- Drosophila maculosa* Coq. Riverton, ix, 23.
inversa Walk. Avalon, vi, 8.
ordinaria Coq. MS. Riverton, viii, 4.
multipuncta Loew. Cape May, ix, 23 (Viereck).

OSINIDÆ.

- Elachiptera formosa* Loew. Riverton, ix, 8.
tongula Loew. Clementon, vi, 3.
Siphonella inquilina Coq. Manumuskin, x, 8 (Daecke).

AGROMYZIDÆ.

- Lobioptera lactipennis* Loew. Avalon, vi, 9.
arcuata Loew. Riverton, viii, 25; Anglesea, ix, 21; Lucaston, viii, 10 (Daecke).
Rhinoessa albula Loew. Wildwood, viii, 27.

BORBORIDÆ.

- Borborus geniculatus* Meig. Merchantville, xi, 16 (Daecke); Boonton, iii, 3 (Greene).

PHORIDÆ.

- Hypocerc johnsoni* Brues. Riverton, viii, 31.
Aphiochæta epeiræ Brues. Dunnfield, Delaware Water Gap.

flava Fallen. "N. J."

atlantica Brues. Atco.

minuta Aldr. Boonton, i, 15 (G. M. Green).

All the species referred to the genus *Phora* (Cat., page 695) should now be placed in this genus.

- Coniceru altra* Meig. Dunnfield, Delaware Water Gap, vii, 8; Newark, vi, 14.
