LXIII.—*On the Contents of the Parts and Dates of Publication of 'Schiner (J. R.), Fauna Austriaca.—Die Fliegen (Diptera),' 1860-1864.* By FRANCIS J. GRIFFIN, A.L.A. (Registrar, Entomological Society of London).

I HAVE recently had through my hands a fine copy of Schiner with the original wrappers still preserved, and, fortunately, bearing the contents of each part in pencil on the wrappers. I therefore take this opportunity of publishing this information for the use of dipterists.

The work originally appeared in 14 "Hefts," of which 3-4, 6-7, 9-10, 11-12, 13-14 were issued as double numbers. In addition to the contents of the work proper, certain of the "Hefts" contained tables of families and genera to assist reference to the parts published.

THEIL I.
